Connection between inverter and ShineGPRS module

A If the inverter RS-232 port is like type A, switch the DIP1 switch to "ON", then connect ShineGPRS

B If the inverter RS-232 port is like type B, remove the rubber plug, then connect ShineGPRS to the

Remove the RS-232 cover of the inverter, plug ShineGPRS to the RS-232 port:

to the inverter RS-232 port, and fix it with the screws.

inverter RS-232 port, and fix it with the screws.

### Step3. Turn on inverter and check ShineGPRS state

F +86 755 2747 2131

W www.growatt.com

After install the ShineGPRS module, turn on the inverter, red LED flashing and blue LED flashing (change every 0.2 sec) indicates the inverter and ShineGPRS cohmmunication is normal.

Blue LED state	Indication	Red LED state	Indication
OFF	ShineGPRS not connected well with inverter RS232 port	OFF	Network communication part not working
Always ON	ShineGPRS initialization	64ms ON 800ms OFF	Not found the network
Flashes fast(change every 0.2 sec)	ShineGPRS and inverter communication is OK	64ms ON 3000ms OFF	Register to network
Flashes slow(Change every 1 sec)	ShineGPRS, network and inverter communication is OK	64ms ON 300ms OFF	GPRS Network communication OK

#### Step4. Registration and adding device

Step2.

Scan the QR code below to download ShinePhone, also you can search ShinePhone in iOS or Google Play Store, download and install it.

Note: 1. Make sure you download the latest version; 2. For further information please visit server.growatt.com.

[Android&iOS]

1. Open ShinePhone APP, click "Register" on login page.

Note: If you select a wrong country and city, the system time maybe wrong.

will guide you to the "Add datalogger" page.

#### 2. Select country and city, then click "Next" enter next page. 3. Fill out the required information, then click "Next", it 4. Scan or input the ShineGPRS barcode and checkcode, then click "Register", after register succeed, it will move you to the "my plant" page.

5. In "my plant" page, select the inverter in the device list to check the inverter update inform

6. If you want to add/edit/delete/configure a datalogger, click the "+" sign on the right top side of the "my plant" page. There are 4 options in the dialog window when push on the datalogger's serial number, click the one you need.

Note:1) After add ShineGPRS to server account, it will automatic communicate with Growatt server, you can remove the rubber plug on the KEY button to check the blue LED, when it turns from flash every 0.2 sec to flash every 1 sec, mean communication OK.

2) If want change ShineGPRS to a new account, delete it from previous account first, then add it to new account.

3) If want to set ShineGPRS to factory settings, remove the rubber plug, and press the KEY button for 6 sec until blue LED always ON. 4) If want to restart ShineGPRS, short press the KEY button.

## **Appendix A**

#### Troubleshooting

LED State	Indicate	Troubleshooting
ALL LED are OFF	ShineGPRS can not found the inverter via RS232 port	1.Check if the DIP switch beside inverters RS232 port is switched DIP1 to "ON" 2.Try to reconnect ShineGPRS to the inverter RS232 port
Blue LED keeps flashing every 0.2 sec (0.2 sec ON, 0.2 sec OFF, As one cycle)	ShineGPRS not connect to Growatt Shine Server	1.Not insert SIM card or SIM card not install well 2.ShineGPRS not add to Shine Server account 3.Server address wrong
Blue LED keeps flashing every 1 sec(1 sec ON, 1 sec OFF, As one cycle)	ShineGPRS, inverter and Growatt Shine Server communication OK	Normal working state
